ipark

SECURE DATA MANAGEMENT SOLUTIONS

Do you need immediate & secure access to files from separate locations?
Are you unable to send files via email due to attachment size limitations?

Then iPark can assist you.

iPark is a secure, web based file transfer application that allows the secure, efficient & high speed transfer of any files via the Internet. It is accomplished by 'Parking' and then 'Collecting' the file from the iPark website. You can transfer files, any type or any size, to the internet and access them from any PC connected to the internet. *

From a low entry cost of $14.95 (inc GST) per month, iPark will assist your company's efficiency, by eliminating the need to save the file to disk and then having to transport. Be free from the strict size limitation on email attachments. Be anywhere in the world and quickly access the file you need from any internet-connected PC. *

*Terms & Conditions apply. Please refer to the iPark web site

Why use iPark?

Saves you time	You no longer need to copy files to CD or floppy disk when needing to transport them - all the transferring is done from your PC using your internet connection. No more wasting time running around town obtaining files.
Easy to use	iPark's user interface is simple and straight forward. It's intuitive design means minimal training for you or your clients. Simply point and click! No need to purchase or install special programs.
Fast	Thanks to iPark's high speed internet connection you will be able to park and collect files at the maximum speed of your internet connection.
Accessible	You can access the iPark site from any internet connection. This means you can access your files from the office, from home, interstate, overseas or even on the road!
Secure	iPark uses the highest internet encryption available (128 bit). This is the same level of encryption banks use. This ensures no one but you or your intended recipient can access or intercept your files. Our system is over 100 times more secure than transferring files via email. Sending attachments via email can easily arrive corrupted, can get "lost" or can be intercepted. It is common for emails with attachments to be blocked due to spam software. iPark eliminates all of these problems.
Email notification	You have the option to notify the recipient of files that are ready for collection.

iPark can be used to transfer any type of file. Imagine being able to share the family photos with relatives overseas! No more worries about file size being too large to email.

Files parked in your iPark folder can be collected immediately. Imagine being able to travel interstate or overseas and still having access to your files from the office. It is as simple as someone at the office parking the file and you logging on to the iPark website to collect your file. You can even continue to work on the file and then re-park the file for your office to re-collect. All this is done efficiently over the internet with the secure iPark server.

Want to incorporate iPark into your day-to-day business? We can provide you with an iPark link to be accessed directly from your own website.

The iPark server is located in a secure Data Centre in Melbourne CBD which guarantees 99.9% up time and extremely fast connections. The only parties capable of accessing information located on the iPark server are the account owners which give permission to link and share a folder with another account holder if requested. The account owner must take measures to protect their username and password.
